

Examples
 Count 3 cakes.
 Count 4 cakes.
 How many altogether?
 I've got 2 red pens and 1 blue pen. How many altogether?
 Start at 4 and count on 3.
 There are 3 people on a bus. 1 more gets on. How many on the bus now?

Vocabulary
 count on, add, one more than, how many altogether? and

Reception

Begin to use pictorial representations

Concrete apparatus models the addition of 3 objects and 2 objects by combining sets

Possibly simple number tracks to count up on:

1	2	3	4	5	6
---	---	---	---	---	---

What is 1 more than 4?

Notes
 Children will mainly use concrete apparatus and practical activities to add; merging sets and then counting the total. They will also count on from a number to find the total

Apparatus
 counters
 Link to Numicon and possibly Education City 0-100 number lines
 Multilink

Examples
 How many are 3 and 5 altogether?
 The plant was 5cm tall but it has grown another 3cm. How tall is it now?
 4 and 6 more makes?
 There are 50 people on the bus, 16 more get on, how many altogether?

Vocabulary
 count on, add, sum, total, how many altogether? and, how many more? score, +, addition, double, near double, one more, two more, ten more

Year 1

Number tracks to count up on:

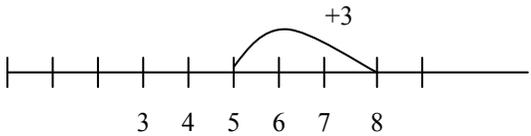

1	2	3	4	5	6	7	8	9
---	---	---	---	---	---	---	---	---

What is 5 add 3?

Number grids

1	2	3	4	...
				...

Filling in missing boxes:
 $5 + 3 = \square$
 (recording number statements)

Notes
 At this stage the children will still be doing a lot of concrete work and may also still use pictorial representations. However, there should be a move towards number tracks, grids and cards as a visual resource
 Children should be encouraged first to know & work out number facts 1-10

Apparatus
 Numicon
 0-100 number lines
 Cuisenaire rods,
 numbered number lines,
 Stern
 Multilink

Year 2

Calculation Strategies

Number Stories

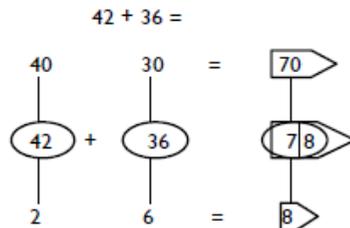

There are 50 people on the bus 16 more get on how many altogether?

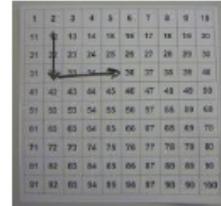

Missing Boxes

$$\square + 12 = 20$$

Addition as partitioning and recombining:

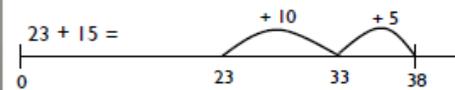

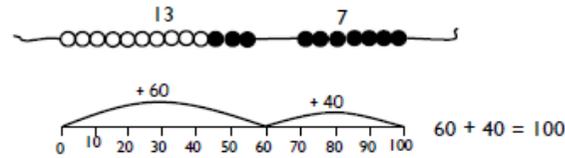

$$12 + 23 = 12 + 20 + 3$$

Number bonds

Use knowledge of number bonds to 10 to help with bonds to 20 and multiples of 10 to 100

Notes

Year 2 will still use many ideas from Year 1 but should begin to move on to using simple number lines which allow the children to record their working. These should include calculations where tens boundaries need to be crossed.

Apparatus

Numicon
0-100 number lines
Cuisenaire rods,
numbered number lines,
blank number lines, Dienes apparatus
Multilink

Examples

What is the sum of 19 and 4?
Add 60 to 30?
Increase 40 by 20.
The chocolate bar was 12p last week, but today the price went up by 3p. What is the price now?

Vocabulary

count on, add, sum, total, how many altogether? and, how many more? score, +, addition, double, near double, one more, two more, ten more, hundred more

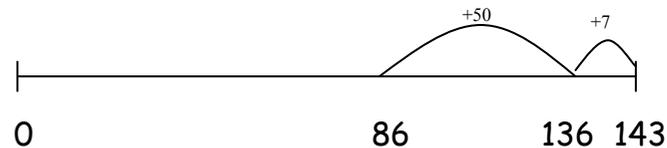

Year 3

Missing Boxes:

$$13 + \square = 20$$

Number lines:

$86 + 57$ (most or least significant first)

Column:

$$\begin{array}{r} 86 \\ + 57 \\ \hline 130 \\ + 13 \\ \hline 143 \end{array}$$

Notes

In Year 3 children should continue to use the horizontal number line and introduce the expanded column method. Children should add the least significant digit first. They should be carrying out the following calculations:
TU+TU, HTU+TU then HTU+HTU.
These should be done first without crossing any boundaries

Apparatus

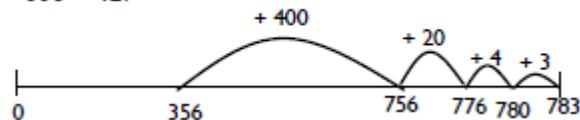

Numicon
0-100 number lines
Cuisenaire rods,
numbered number lines,
blank number lines, Dienes apparatus
Multilink

Year 4

Number lines (as year 3) and:

Addition: partitioning one number

$$356 + 427$$

Column:	754
	<u>96</u>
	10
	140
	<u>700</u>
	850

754 + 96 (taking jumps in multiples of 10 or 100)

Notes

Children in Yr 4 should continue to use the horizontal number line however, encourage use of visualisation of lines and grids. The children should still add least significant digit first but should make use of the rounding and adjusting method in both columns and on number lines. They should be carrying out the following types of calculations: HTU+TU & HTU+HTU. Calculations should involve crossing the tens, hundreds or both boundaries.

Apparatus

Numicon
0-100 number lines
Cuisenaire rods
blank number lines, Dienes apparatus
Multilink

Examples

What is the sum of 26 and 39?
add 69 to 74
Increase 48 by 22
Bill earns £120. His boss gives him a pay rise of £35. What does Bill now earn?

Vocabulary

count on, add, sum, total, how many altogether? and, how many more? score, +, addition, double, near double, one more, two more, ten more, hundred more, increase

Year 5

Column (including rounding and adjusting) leading to:

$$\begin{array}{r} 597 \\ + 475 \\ \hline 12 \\ 160 \\ \hline 900 \\ 1072 \end{array}$$

$$\begin{array}{r} 597 \\ + 475 \\ \hline 1072 \\ 11 \end{array}$$

Extend to 1 place decimals	72.5
	<u>+54.6</u>
	127.1

Extend to 2 place decimals	£ 73.42
	<u>+£ 84.73</u>
	£158.15

Notes

Children in Yr 5 use the same column method as those in Yr4 (including rounding and adjusting method), using the least significant digit first. Children should be working with ThHTU+ThHTU. The children should also extend these ideas to working with simple decimals.

Apparatus

Numicon
0-100 number lines
Cuisenaire rods
blank number lines, Dienes apparatus
Multilink

Examples

What is the total of 229 and 39?
Which 3 numbers could have a total of 450?
Increase 190 by 37

Vocabulary

count on, add, sum, total, how many altogether? and, how many more? score, +, addition, double, near double, one more, two more, ten more, hundred more, increase
